Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3723

1. The election of the lens blank of 08/15/06 is hereby acknowledged. Upon further review, additional Restriction/Election as indicated below is required for this species.

2. This application contains claims directed to the following patentably distinct sub-species:

There are various patentably distinct sub-species based on the different reference datum indicators as follows:

Group 1, a peripheral rim 20 having a known thickness dimension as shown in the Fig 1A embodiment;

Group 2, circumferentially extending peripheral groove or recesses as shown at 48 in the embodiment of Fig 1B, for example;

Group 3, axially extending peripheral groove or recess as shown at 52 in the embodiment of fig 1B, for example;

Group 4, tapering wall or tapering peripheral surface of lens blank (see Fig 1C, for example);

Group 5, cylindrical peripheral surface of lens blank (as described, for example, in connection with fig 2B);

Group 6, axial length formed by processing an outer surface to form a cylindrical portion thereof (as shown at L in Fig 2A and T in Fig 4B, for example);

Group 7, front face of a peripheral shoulder (see 96 Fig 2C, for example)

Group 8, face of lens (see Fig 4B);

Group 9, a single annular shoulder (see S in fig 4B);

Although not a part of the lens blank as far as the examiner can tell from the specification, the adapter ring has various reference datum indications such as hole 198.

One or more of these may have been claimed as part of the lens blank (see, for example, claim 33). Also, it is noted that the blocker is disclosed as having various datum indicators. Each different indicator is restricted into its own group to the extent the particular indicator has not already been identified above. However, per the usual practice, prosecution of claims to these indicators as part of the lens blank, will depend upon sufficient support in the disclosure as filed, for their use in the lens blank per se.

The species are independent or distinct because they do not overlap in scope, they are not obvious variants, and as claimed they can have a materially different design, mode of operation, function or effect.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election:

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 3723

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob K. Ackun Jr. whose telephone number is (571)272-4418. The examiner can normally be reached on Monday through Friday 8.30AM-5.00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail can be reached on (571)272-4485. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
